

Turn one classroom into your school's AI Lab

The EduSoulX AI Tab Lab puts locked learning tablets, Munja AI and VidyaUpasna LMS in one room. Every class gets its turn, and the teacher sees who needs help while the period is still on.

Live view, as the teacher sees it

■ Understood

■ Working slowly

■ Needs help

Six zones inside the AI Lab

Students sit in round pods of 5, not in rows. The room is built around learning together, asking questions and seeing progress live.

● Learning pods

Round tables of 5. Each student works on their own tablet and the pod solves challenges as a team.

● Teacher command desk

Every tablet shows green, amber or red on the dashboard, so the teacher goes straight to the student who is stuck.

● Smart charging wall

One numbered slot per tablet. Students pick up and return their own tablet in a minute, charged for the next class.

● Ask Munja AI wall

A big screen where the class asks Munja AI together and watches the answer build step by step.

● Leaderboard wall

Quiz scores and badges update during the period. Students stay focused and try one more question.

● Presentation stage

A small stage where students explain a topic or show their project to the class.

One AI Lab period, 40 minutes

The teacher chooses the class, subject and chapter on the dashboard. Students collect their numbered tablets and log in with their class login.

10 minutes

Learn

A short concept video from VidyaUpasna.

10 minutes

Ask Munja AI

Every student asks their own doubt. The best question goes up on the Munja wall.

15 minutes

Practise

A practice paper or pod quiz, checked automatically, with scores on the leaderboard.

5 minutes

Report

The teacher sees who understood before the bell.

One lab for the whole school

Classes take turns, like a computer lab. A school of 600 students in 12 classes gives every class three AI Lab periods a week from a single 50-tablet lab.

600

tablets to give every student one

50

tablets in one AI Lab

	P1	P2	P3	P4	P5	P6
Mon	3A	4A	5A	6A	7A	8A
Tue	3B	4B	5B	6B	7B	8B
Wed	8A	7A	6A	5A	4A	3A
Thu	8B	7B	6B	5B	4B	3B
Fri	5A	3A	7A	4A	8A	6A
Sat	5B	3B	7B	4B	8B	6B

Sample week: 12 classes, 3 AI Lab periods each

Choose your lab size

Every lab is built from pods of 5 students. Start with what fits today and add pods later.

Starter Lab

5 pods, 25 tablets. Up to about 300 students.

- 25 locked EduSoulX tablets
- Munja AI and VidyaUpasna LMS
- Charging wall or trolley
- Wi-Fi setup and training

[Ask for price](#)

Standard Lab

10 pods, 50 tablets. About 300 to 600 students.

- 50 locked EduSoulX tablets
- Munja AI and VidyaUpasna LMS
- Smart charging wall
- Wi-Fi setup and training
- Management dashboard

[Ask for price](#)

Campus Lab

20 pods, 100 tablets. About 600 to 1,200 students.

- 100 locked EduSoulX tablets
- Two labs, or lab and AI Lab on Wheels
- Munja AI and VidyaUpasna LMS
- Wi-Fi setup and staff training
- Management dashboard

[Ask for price](#)

A lab room, or a lab on wheels

Fixed AI Lab

A dedicated room with pods, the Munja wall, the leaderboard and the charging wall. Classes come as per the timetable.

AI Lab on Wheels

No spare room? Tablets travel in a lockable charging trolley, and the classroom's own screen becomes the Munja wall.

What comes with every lab

Locked EduSoulX tablets

10.1-inch learning tablets. No browser, no social media, the camera is locked, and students cannot install apps or change settings.

VidyaUpasna LMS

Videos, notes, practice papers and tests for CBSE, ICSE and State Board, checked automatically.

Class logins and dashboards

Logins for every class, a dashboard for teachers and one for management.

Munja AI inside

The AI teacher on every tablet. Students ask in simple language and get step-by-step answers.

Secure Wi-Fi

Set up so that only your lab tablets can connect.

Training and support

Training at your school, then phone and WhatsApp support in office hours.

Ask for the price of your AI Lab

Each school is different. Send us these details on WhatsApp and we will share your quotation.

1. School or class name and city
2. Number of students
3. Lab size: Starter, Standard or Campus
4. Fixed AI Lab or AI Lab on Wheels

Free for your school

See the AI Lab with your own students

Our team brings the tablets to your school for one Demo Day and runs a real AI Lab period while you watch.

- 1 **Pick a date and a class.** WhatsApp or call us.
- 2 **We set up** in any classroom in about 30 minutes.
- 3 **Your students learn,** ask Munja AI and take a quiz.
- 4 **You see the report** for every student on the dashboard.

Management sees progress, parents see value

Reports for management

Weekly lab use by class

Monthly subject-wise performance

Student participation

Teacher activity

Less paper and less checking work

A monthly report for parents on WhatsApp

Parents see what their child did in the AI Lab every month.

AI Lab report, October

Periods attended: 11 of 12

Practice papers done: 9, average score 78%

Strong in fractions. Needs practice in decimals.

Parents can also buy their own EduSoulX tablet for home, with EMI.

From first visit to a running lab

Step 1

Plan

We count students, classes and periods, and check the room, power and internet.

Step 2

Install

Pods and charging wall set up, tablets numbered and locked, class logins created.

Step 3

Train

Hands-on training for teachers and the AI Lab in-charge.

Step 4

Hand over

Every tablet tested, handover signed, lab added to the timetable.

Questions schools ask

No spare room?

Choose the AI Lab on Wheels. Tablets move from class to class in a lockable charging trolley.

Can we use our own projector or smart TV?

Yes. Any screen in the room that connects to the teacher's device can show Munja AI and the leaderboard.

Who runs the lab?

One teacher as AI Lab in-charge. We train this teacher and your subject teachers.

Can students misuse the tablets?

No. No browser, no social media, the camera is locked, and students cannot install apps or change settings.

Which syllabus?

CBSE, ICSE and State Board content in VidyaUpasna LMS, arranged as per your school calendar.

What support do we get?

Training at your school, phone and WhatsApp support in office hours, remote software help, and repair or replacement under warranty.

Give your students an AI Lab this year
